

PhoneHub Pro

The Complete Digital Operating System for Modern Phone Dealers

Imagine Never Losing a Sale Again...

A customer walks into your shop asking for a phone you don't have.

Instead of searching through hundreds of WhatsApp chats, looking for supplier contacts, calling multiple colleagues, or watching the customer walk away...

You simply search the phone in your system.

Within seconds, you know exactly who has it, who is selling at the best price, how much profit you'll make, and how quickly you can deliver it.

Your business instantly becomes bigger than the phones sitting on your shelves.

The Game Changer: Smart Dealer Network

This is the feature that completely changes how phone dealers do business.

Connect all your trusted colleagues, suppliers, and partner stores into one private network.

Whenever you need a phone, simply search the model and instantly see:

- Who has it available
- The lowest supplier price
- Available colors and storage
- Number of units available
- Expected profit before selling
- Preferred suppliers based on previous transactions

No more calling 20 people.

No more checking multiple WhatsApp groups.

No more wasting customers' time.

Just search... compare... buy... and sell.

One-Click Dealer Broadcast

Need a phone urgently?

Instead of spending valuable time calling different dealers, send one request to your entire trusted network with a single click.

For example:

Looking for:

- Samsung S25 Ultra
- 512GB
- Black

Every supplier receives the request instantly and responds directly through the system.

The fastest and best-priced offer wins.

Your customers get faster service.

You close more sales.

Never Lose Your Supplier Network Again

Every phone dealer knows this problem.

WhatsApp accounts get restricted or banned.

Groups disappear.

Important supplier contacts are lost.

Business slows down while trying to rebuild years of relationships.

With PhoneHub Pro, your entire dealer network lives inside your own system.

Your supplier directory, dealer connections, transaction history, and inventory network remain safe, organized, and instantly accessible—regardless of what happens to your WhatsApp account.

Your business no longer depends on a messaging app.

Live Price Comparison

Buying smarter means making more profit.

When multiple dealers have the same phone, the system instantly compares their prices.

Immediately see:

- Cheapest supplier
- Highest supplier
- Average market price
- Your expected profit
- Best buying option

Negotiate confidently.

Sell competitively.

Increase your profit on every deal.

Smart Inventory Management

Know exactly what you own at any moment.

Track:

- New and used phones
- IMEI numbers
- Colors and storage
- Battery health
- Stock quantity
- Purchase cost
- Selling price
- Profit margin

Everything updates automatically after every purchase or sale.

Buy, Sell & Trade Between Dealers

Your business doesn't only sell to customers.

You also buy from other dealers and sell to fellow dealers.

PhoneHub Pro keeps track of every transaction between trusted partners, making collaboration faster, more organized, and more profitable.

Customer Relationship Management

Turn one-time buyers into repeat customers.

Keep a complete history of every customer:

- Previous purchases
- Preferred phone brands
- Budget range
- Warranty information
- Trade-ins
- Repairs
- Purchase history

Offer a more personalized experience every time they return.

Never Miss Another Sale

If a customer requests a phone that isn't available, don't let the opportunity disappear.

Simply save the request.

The moment that phone becomes available—either in your store or through your dealer network—the customer can be contacted immediately.

Every missed opportunity becomes a future sale.

Professional Sales Experience

Generate everything instantly:

- Invoices
- Receipts
- Warranty cards
- Sales records

Every transaction is stored securely for future reference.

Complete IMEI Tracking

Every phone has a story.

Track every device from purchase to final sale.

Know:

- Where it came from
- Who supplied it
- Purchase price
- Selling price
- Customer information
- Warranty status

Complete accountability for every device.

Phone Swap & Trade-In Management

Evaluate used phones professionally.

Record:

- Battery health
- Screen condition
- Cameras
- Face ID/Fingerprint
- Charging

- Physical condition

Instantly calculate a fair trade-in value and expected resale profit.

Repair & Service Management

Track every repair from check-in to collection.

Monitor:

- Device status
- Assigned technician
- Parts used
- Completion progress
- Customer updates

Nothing gets forgotten.

Payment & Credit Management

Manage customer installments and supplier credit with ease.

Track:

- Outstanding balances
- Payment history
- Due dates
- Automatic reminders

Stay in control of your cash flow.

Overseas Purchase Tracking

Monitor imported phones from overseas suppliers.

Track:

- Shipments

- Expected arrival dates
- Supplier information
- Purchase costs
- Delivery status

Plan your inventory with confidence.

Smart Business Dashboard

Your business, in one screen.

Instantly see:

- Daily sales
- Monthly revenue
- Profit performance
- Best-selling phones
- Top-performing suppliers
- Fastest-moving products
- Slow-moving inventory
- Inventory value
- Cash flow

Know exactly how your business is performing at any time.

Staff Performance Tracking

Measure productivity effortlessly.

Track:

- Individual sales
- Revenue generated
- Profit contribution

- Commission
- Sales rankings

Reward performance based on real data.

Increase Every Sale

The system automatically suggests accessories that match each phone being sold.

Recommend:

- Phone cases
- Screen protectors
- Chargers
- Earbuds
- Power banks
- Smart watches

Increase the value of every transaction without extra effort.

Smart Business Automation

The system automatically reminds you about important events.

Including:

- Warranty expiry
- Customer follow-ups
- Outstanding payments
- Reserved phones
- New stock arrivals
- Low inventory alerts

Your business works even when you're busy.

Make Better Business Decisions

Stop relying on guesswork.

Use real business data to discover:

- Which phones generate the highest profit
- Which suppliers give the best prices
- Which products sell the fastest
- Which inventory is sitting too long
- Which staff members perform best
- What to reorder before demand increases

Run your business based on facts—not assumptions.

Future Expansion Roadmap

PhoneHub Pro is designed to grow alongside your business. Beyond the core features, the platform can evolve into a powerful ecosystem that connects dealers, protects customers, and creates a safer, smarter phone marketplace.

PhoneHub Secure™ – Digital Phone Ownership System

Every phone sold through the platform can receive a digital ownership record linked to its IMEI.

This creates a complete lifecycle for every device, including:

- Original purchase details
- Current owner
- Warranty history
- Repair history
- Trade-in records
- Ownership transfer history

Instead of relying on paper receipts, ownership can be verified digitally at any time.

Digital Ownership Transfer

When a customer sells their phone to another person, ownership can be transferred securely through the system.

The new owner simply registers their details, and the phone's digital ownership certificate is updated automatically.

Benefits include:

- Verified ownership records
- Easier warranty validation
- Greater trust during resale
- Complete ownership history for every device

Stolen Phone Protection

If a customer reports a phone as stolen, the device can be flagged instantly within the system.

Whenever that IMEI appears again—whether for a repair, trade-in, resale, or purchase—the system immediately alerts staff that the device has been reported stolen.

This helps protect both customers and dealers from unknowingly buying or handling stolen phones.

Dealer Anti-Theft Network

As more phone dealers join the platform, every participating store benefits from a shared security network.

A phone reported stolen in one shop can automatically be recognized across all connected dealers.

This creates a powerful industry-wide protection system that makes it much harder for stolen devices to be resold within the network.

Customer Self-Service Portal

Customers will have access to their own digital account where they can:

- View purchase history
- Download invoices and receipts
- Access warranty information
- Register ownership transfers
- Report lost or stolen devices
- Track repair status
- Request support

Providing a modern after-sales experience that builds trust and customer loyalty.

Smart Device Recovery Support

While the system cannot directly track a phone's live location using its IMEI, it can provide a centralized recovery process by:

- Storing verified ownership records
 - Flagging stolen devices across the dealer network
 - Integrating with official device recovery services such as Apple Find My and Google Find My Device
 - Assisting customers with faster recovery and verification processes
-

Building the Largest Trusted Dealer Network

The long-term vision is to create the largest connected network of trusted phone dealers.

A marketplace where members can:

- Find available phones instantly
- Compare supplier prices in real time
- Source devices from trusted colleagues
- Verify device ownership
- Detect stolen phones before purchase
- Build stronger business relationships
- Complete more sales with greater confidence

As the network grows, every new dealer increases the value of the platform for everyone else.

The goal isn't just to build software—it's to build the digital infrastructure that powers the future of phone trading.

The Vision

PhoneHub Pro isn't just another inventory application.

It's a complete business ecosystem built specifically for phone dealers.

It connects your shop with your trusted dealer network, organizes your operations, protects your supplier relationships, automates repetitive tasks, and gives you the tools to serve customers faster than ever before.

Instead of managing your business through notebooks, spreadsheets, WhatsApp chats, and memory, everything lives in one secure, intelligent platform.

The Result

- ✓ Never lose a sale because a phone isn't in stock.
- ✓ Find any phone from your trusted dealer network in seconds.
- ✓ Compare supplier prices instantly.
- ✓ Protect your business from losing supplier contacts when WhatsApp accounts are restricted or banned.
- ✓ Close sales faster.
- ✓ Make better buying decisions.
- ✓ Increase profit on every transaction.
- ✓ Build stronger customer relationships.
- ✓ Gain complete visibility into every aspect of your business.

PhoneHub Pro transforms your shop from a single phone store into a connected marketplace powered by your entire trusted dealer network.
